Work Experience

UX Researcher & Accessibility Specialist | General Motors

July 2015 - July 2016 | Warren, MI

Worked on General Motors' next iteration of their in-vehicle touch screen systems. Responsible for conducting user research on various software applications designed for Infotainment 3.0. Research Methodologies used include: Usability Testing, Heuristic Evaluations, Online Surveys, and Contextual Interviews. Additionally, provided accessibility guidance to UX Designers using WCAG 2.0 guidelines.

UX Intern | Usability/Accessibility Research & Consulting

December 2013 - May 2015 | East Lansing, MI

Responsible for performing accessibility evaluations using WCAG 2.0 guidelines for contracted clients. Additionally, conducted Usability Testing, Heuristic Evaluations, Contextual Interviews, and trained student interns on how to use and apply WCAG 2.0 accessibility guidelines.

Projects

UX Designer | Tutor Time

August 2017 - December 2017 | Ann Arbor, MI

Created an application geared at helping high school students with their homework and exam preparation. The application centers around Peer to Peer learning with a built in rating system for students to evaluate others' performances. The Design Process for Tutor Time included: Paper Prototyping, High Fidelity Prototyping, Usability Testing, User Interviews, Heuristic Evaluations, and Competitive Analysis.

UX Researcher | Health Information Technology & Services

January 2018 - April 2018 | Ann Arbor, MI

Conducted UX research for Health Information Technology & Services within the University of Michigan. Project involved creating a series of guidelines for several websites our client manages. To create these guidelines, we performed several UX research methodologies including: Contextual Interviews, Online Surveys, Heuristic Evaluations, Usability Testing, Interaction Maps, and Competitive Analysis.
